COMPLETE SOLUTION FOR
CONE TRANSPORT AND PACKING

CTS

CONE TRANSPORT SYSTEM

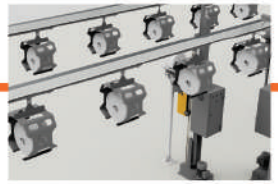

Benefits:-

Streamlined Operations
Consistent Quality
Reduced Contamination
Article-wise Sorting
Enhanced Production Efficiency
Automatic Handling
Labor Cost Savings

Suitable for Transportation

- Ring Spinning - Autowinder
- Rotor Spinning
- Airjet Spinning

1 
Cone Picking Station

2 
Cone Transportation

3 
Cone Inspection & Sorting

4 
Cone Palletizing

5 **Yarn Conditioning Plant (Optional)**

6 **Packing**

Bag

Box

Pallet

C-O-NE i

Computer vision powered Cone inspection system

INDO TEXNOLOGY®
Automate and Inspect to lead

Automatic Cone Inspection System as an add on to Auto Cone Pack
(Also available as a standalone product)

Automatic Inspection and Alert on:

- Cone Tip Identification: For any variation in design/colour and alerts for instant stopping.
- UV Defect Analysis

Cone Tip Identification

UV image Analysis

AUTO CONE-PACK® Box Packing (Carton)

Automatic cone packing into Cartons

INDO TEXNOLOGY®
Automate and Inspect to lead

Benefits

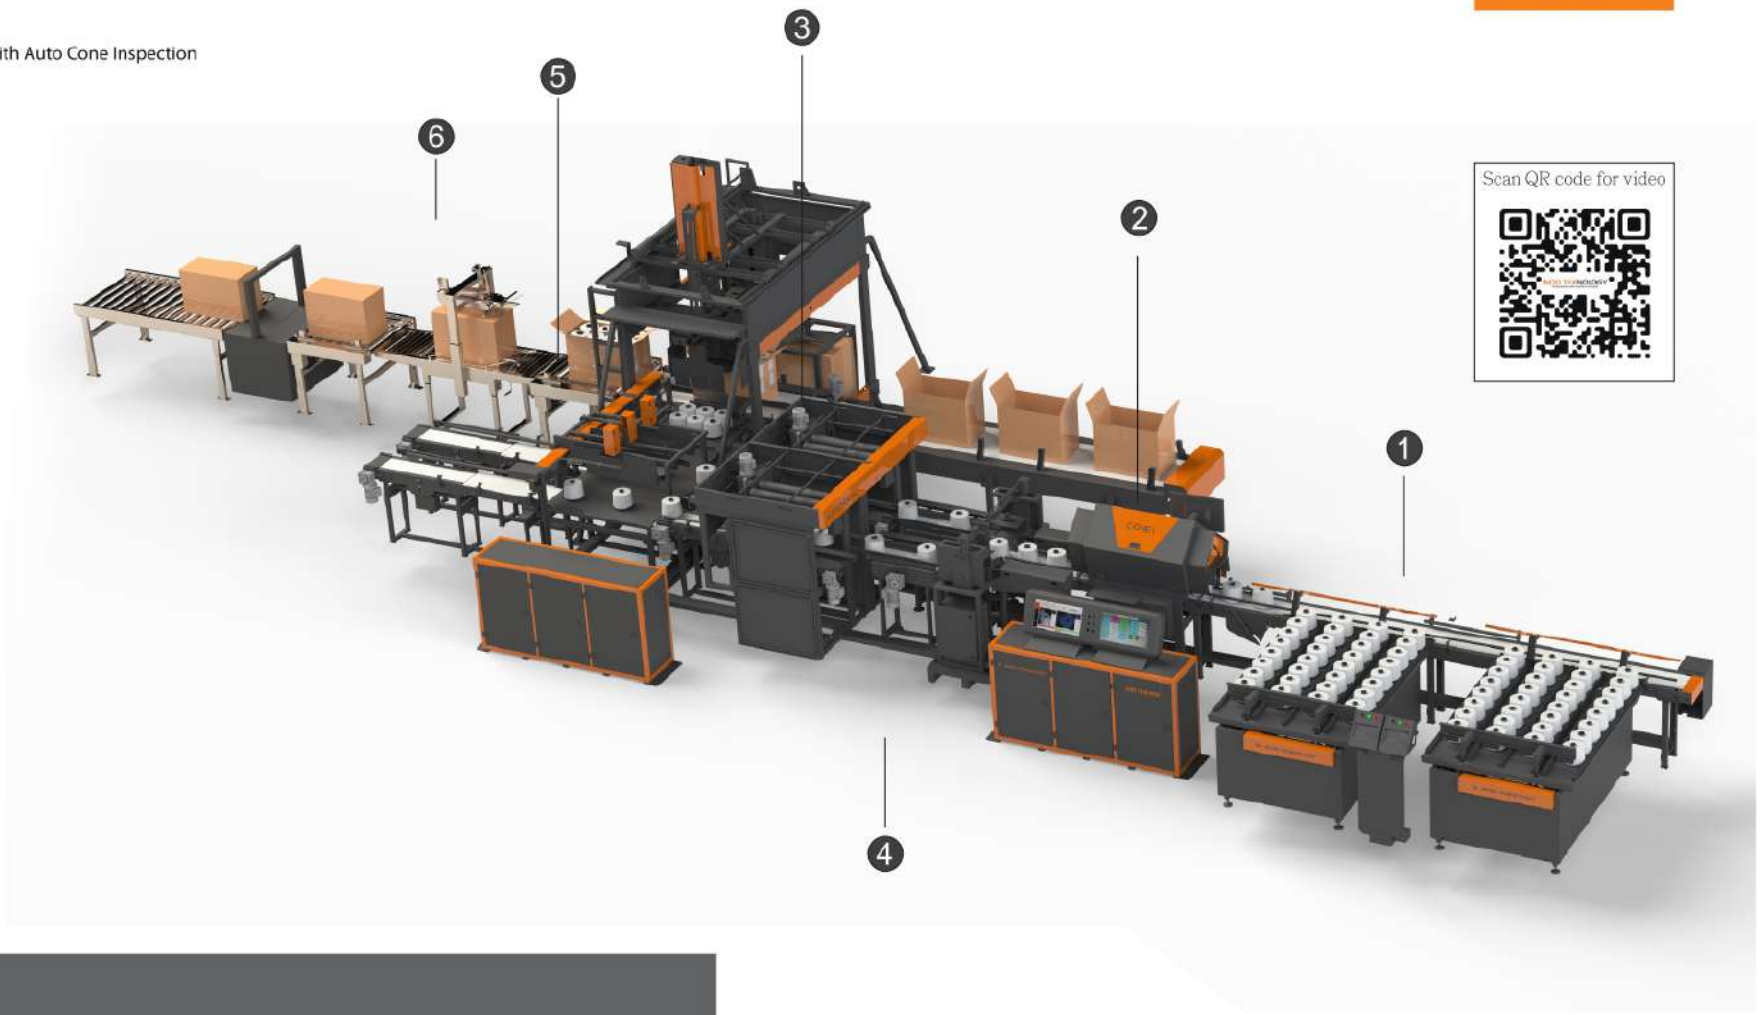

- Weight control of packed cartons
- Consistent Packing
- Packing Data
- Integrated to Mill IT
- Tracking/Tracing
- Avoids Mix-ups and errors with Auto Cone Inspection
- Man power saving

- Cartons of different sizes and configuration possible
- Automatic taping and strapping of boxes
- Label print with barcode
- Auto Cone Inspection
- Remote Diagnostics

100+
Installations

Legend

1. Cone Weighing Station
2. Cone Inspection
3. Control Panel
4. Polythene Wrapping
5. Boxing
6. Taping & Strapping

AUTO CONE-PACK® Bag Packing (Sack)

Automatic cone packing into bags

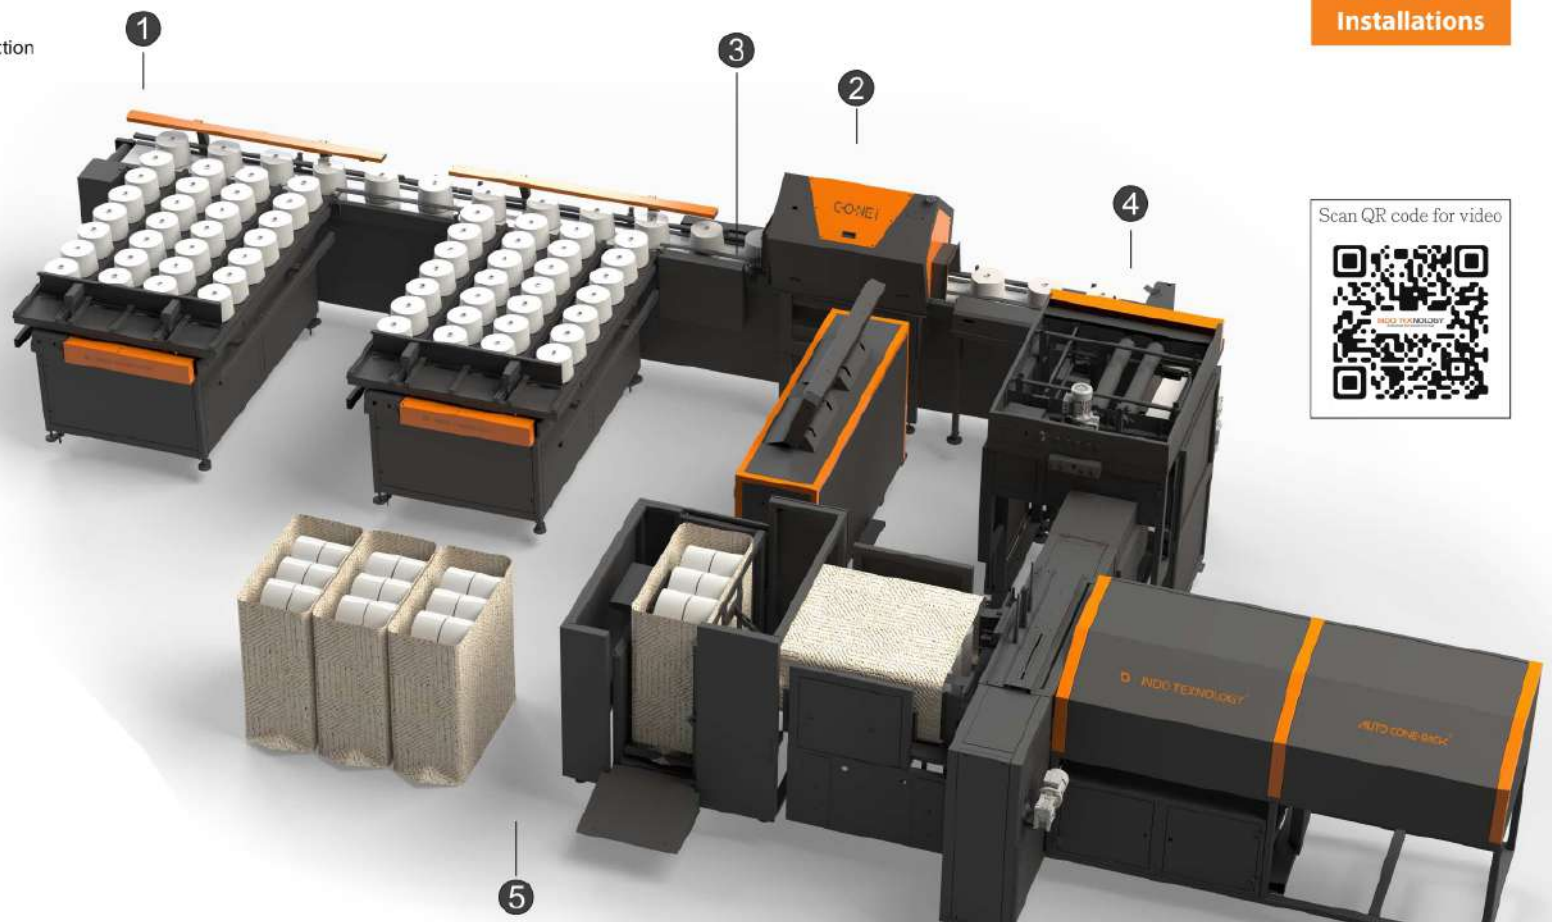

INDO TEXNOLOGY®
Automate and Inspect to lead

Benefits

- Input control of packed Bags
- Consistent Packing
- Packing Data
- Integrated to Mill IT
- Tracking/Tracing
- Avoids Mix-ups and errors with Auto Cone Inspection
- Man power saving

- Bags / Sacks of different sizes and configuration possible
- Auto Cone Inspection
- Remote Diagnostics

100+
Installations

Legend

1. Cone Weighing Station
2. Cone Inspection
3. Control Panel
4. Polythene Wrapping
5. Bagging

SORTLINK® MAGIC

AI Vision Based Bobbin Colour Sorting

INDO TEXNOLOGY®
Automate and Inspect to lead

Automatic Bobbin Sorting System -
Attached to auto winders

Camera + Artificial Intelligence
= 100% Accuracy

- No Limitations
- No Extra Space Required
- No Skill Required: Auto Colour Teaching
- Data on Rejected Bobbin

6 Way sorting

4 Colours

Full Bobbins

Remnant Yarn Bobbins

- Sorts empty bobbins of upto 4 different colours
- Segregates full bobbins
- Segregates bobbins with remnant yarn
- High Speed - Installed on 100 drum auto winders
- High Reliability - Minimal movements and no sensors

Benefits

- Accuracy -100% colour segregation
- Flexibility - All colours can be segregated
- Minimal training - Easy to teach and save multiple colours
- Remote diagnostics - Our engineers can diagnose and help mill engineers online
- Minimal maintenance - Minimal Movements and No Sensors
- Can be linked all models: Murata, Savio, Schlafhorst
- Live report - Full bobbin rejection %, Remnant yarn (Kirchi/ Gira bobbin) %
